

NEW PRODUCT

Speed Control Motor and Controller Package **US2 Series**

Advanced Speed Control Motor
Sophistication and high performance
with greater usability.

•Easy operation

With the digital display panel and setting dial installed, you can intuitively operate the motor, like "turn as needed and push". The operation setting is simple to use without using manual.

Turn the dial to set desired value and the speed.

[Start/Stop]
You can switch start/stop or rotation direction by just one switch operation. No external switch is required.

Variable Speed Range
50 Hz: 90~1400 r/min
60 Hz: 90~1600 r/min

•Simple wiring

Simply connect the motor with the speed controller and the power supply, the controller will start right away. The connectors and built-in Capacitor of the speed controller save you from wiring problem.

Simple connection using the connector between the motor and the speed controller. The distance between the motor and the speed controller can be extended up to 10.5 m.

The built-in capacitor do not require wire connection, hence saving space.
